Data Cleanup

REVIEW

HISTORY

Meets Specifications

Dear student,

Thanks for submitting your project for review!

It was a great submission: it meets all the required criteria!

Keep up the great work and good luck on the next project! It's time we put this dataset to use in order to make sales predictions! 😊

Business and Data Understanding

The section is written clearly and is concise. The section is written in less than 250 words.

All following questions have been answered:

1. What decisions need to be made?
2. What data is needed to inform those decisions?

Building the Training Set

The averages for each column is correct in the training set

Outliers have been analyzed for each field in the training set.

The outliers are accurately identified.

The decision to keep, remove, or impute each outlier is well justified.

After pointing out all the possible outlier cities only one city should be decided upon to remove.
